

Evrin Ozulu

hi@evrim.dev | evrim.dev | github.com/whotookzakum

Software engineer with a passion for creating user-centered interactive web apps with real-world impact. Proficient in React and Svelte, I'm eager to contribute to a dynamic team focused on innovative solutions.

WORK EXPERIENCE

Full Stack Engineer, Freelance

June 2021 — Present, United States

- Leading a team of 4 engineers across 3 continents to update content and build new features
- Served 29 million page views to over **1 million users in 9 months** for zero-cost, generating over \$5000 in profit in Q4 2022 through ad placements
- Architected technology stacks from the ground up, **reducing cost by over 80%** in some cases
- Automated redundant API pipelines, increasing data extraction efficiency by 66%
- Wrote clean, reusable code while adhering to markup semantics and accessibility guidelines

English Instructor, GABA Inc.

March 2020 — April 2021, Tokyo, Japan

- Maintained a 100% conversion rate for trial lessons to student signups
- Administered tests and documented student progress to provide progress reports
- Received positive evaluations for fun and engaging lessons
